

HISTORICAL PERSPECTIVE

EVENT = _____

CRITERIA 1: In relation to the event, how are **past and present views different**? What **information / facts** did people **know in the past** versus what people **currently know** about the event?

CRITERIA 2: Whose **perspectives** do we need to look at? For each perspective identified **make conclusions about their beliefs, values, and motivations.**

CRITERIA 3: Is the source analyzing the event through a contemporary belief system? Is this appropriate? What differences emerge between how the event is currently thought of versus how it was thought of in the past (**focus on values** rather than facts, i.e., are the moral & ethical considerations different now than in the past?).
